Week Summary	<p>Programming using wxWidgets.</p> <p>Downloaded Arduino based programs for Electric Ray Robot. Understanding the programs.</p> <p>Got a reply to issue I raised in multiplo forum to try out the latest version of Minibloq (version 0.82) on Ubuntu. Downloaded and tried the 0.82 version. The issue persists. Updated link -</p> <p><a href="http://multiplo.org/talk/#!/discussion/189/unable-to-start-minibloq-v0-81-beta-up2-in-ubuntu">http://multiplo.org/talk/#!/discussion/189/unable-to-start-minibloq-v0-81-beta-up2-in-ubuntu</a></p>
Time Spent (hrs)	3
Plan for next week	Create a new block in Minbloq
Estimated total remaining time	67
Status	On Track
Problems faced	Though compilation is successful using wxWidgets, execution fails with error message "Process terminated with status -1073741510".
Solution
